Muck Layer

**AFTER
MuckAway™**

Treats 75' of Shoreline up to 6 Months

Approximately 16 Scoops
Net Contents: 8 lbs • 3.6 kg

How does MuckAway™ eliminate mucky bottoms?

Pond muck is caused by rotting vegetation, leaves, twigs and fish waste that has accumulated over time. MuckAway™ is a special blend of natural, beneficial bacteria designed to work on contact. MuckAway™ rapidly dissolves organic waste into an odorless gas which escapes unnoticed out of the water column. MuckAway™ is so effective that when used regularly can remove up to 2 inches of muck per month!

Ma MuckAway™ Natural Beneficial Bacteria

DOSAGE RATE:

Use 1 scoop per 1,000 sq. ft. of treatment area every 2-4 weeks.
Example: To treat a beach area that consists of 75' of shoreline and extends 20' out into the pond or lake: $75 \times 20 = 1,500$ sq. ft. = 1.5 scoops

WHEN TO APPLY: When water temperatures are above 50° F. Treatment should continue until desired results are achieved.

HOW TO APPLY: Broadcast MuckAway™ evenly over the treatment area.

WATER USE RESTRICTIONS:

MuckAway™ may be applied to lakes and ponds used for irrigation and aquaculture. Water treated with MuckAway™ may be used for recreation, fishing and other activities immediately after treatment. Safe for recreational ponds, horses, livestock, birds, pets, fish, wildlife and the environment. *Do not apply to water that will be used for human consumption.*
